

## The world's simplest cloud-based subscription service for panic alerting

We have made it easy to secure you and your employees! Gone is expensive servers, expensive installations, and unsafe operation. Instead, we have moved everything "expensive" is out on the Internet in one super secure setup. We call it 2SafeYOU

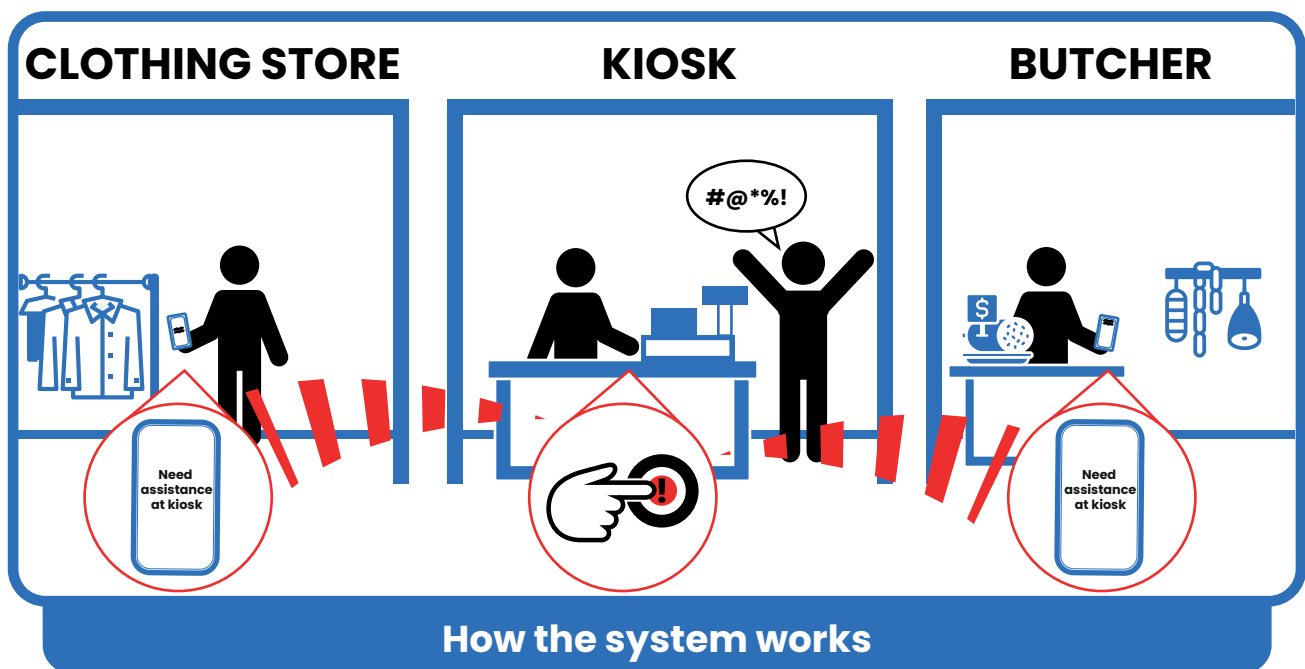

2SafeYOU delivers panic alerting solutions to all industries and all types of customers. If you have a kiosk, a dental clinic, a hotel or working alone in the field, then 2SafeYOU will protect you and your staff and ensure that there will be called for assistance should the accident occur.

2SafeYOU is the market online leading provider of future safe personnel security and panic alerting solutions. With the 2SafeYOU technology you are always secured and can summon assistance regardless of your situation.

## Solution overview

1. The clerk in the kiosk is exposed to an aggressive customer.

2. The clerk presses the panic button.

3. The neighboring shops receive immediate information that the kiosk needs assistance.

## Our packages

Start with one of our two basic packages. The basic packages can be expanded according to the needs, size of your company or number of employees. For both packages, a 24-hour Monitoring centre can be added.

### Indoor Protection

Basic package INDOOR is our solution for shops, receptions, offices, bars etc.

The package contains:

- Smartphone App.
- Mountable panic button or ID card holder.
- Bluetooth Receiver with cables and power supply.
- Call for help by pressing the mountable panic button.
- Your indoor position is sent along with the alarm.
- You choose who and how many will receive the alarms.
- 24-hour automatic alarm monitoring.
- Setup and free support.

### Outdoor Protection

Basic package OUTDOOR is our smallest package which consists of an ID card holder and a Smartphone App. The package is primarily intended for people who work outside.

The package contains:

- Compact panic button or ID card holder.
- Smartphone and ID card holder are connected automatically.
- Call for help by pressing the panic button on the ID card holder.
- The GPS position of the smartphone is sent together with the alarm.
- You choose who and how many will receive the alarms.
- 24 hour automatic alarm monitoring.
- Setup and free support.

You can always expand your basic package with these products.

## Products

#### SMARTPHONE APP

Extra Smartphone App so colleagues, neighbors, friends, family or guards can receive your alarms and come to your rescue.

#### ID CARDHOLDER

The world's most discreet panic alarm! Discreet panic button on the back so you can call for help wirelessly. Insert your regular access card, cash register card or ID card and no one has any idea that it is a panic alarm!

#### BLUETOOTH RECEIVER

The intelligent alarm receiver which also finds your position indoors. Connects to your Internet via cable that is included.
