

P-Series Inferno

Features

- Generates a unique sound which an intruder cannot tolerate
- Protects secured area for the few minutes before security or police can attend
- Significantly upgrades effectiveness of existing systems
- Internal back-up by 1.8 Ah battery gives up to 30 minutes of alarm in the event of power failure to the sander
- Self contained sander
- Automatic battery check

Overview

The Inferno is a powerful internal security sander that effectively stops intruders in their tracks.

Installation of the Inferno cheats the intruder of the time he may expect to enjoy between alarm activation and arrival of security or police.

The unit is easily retrofitted and a number of units can be installed either in series or in parallel.

The special sound waves produced by the Inferno make it exceptionally difficult to locate the source of the unique sound. Despite disorientation and the 'sound barrier shock effect', no long-term hearing problems would be inflicted upon the intruder.
